SUMMARY

Software Engineering graduate with knowledge of React.js, Node.js, JavaScript, and full-stack development. Experienced in developing academic and personal projects, with a strong foundation in software engineering principles and software testing.

WORK EXPERIENCE

Internship

Inotech Solutions

September 2023 to November 2023

- Contributed to the development of the InnoTech Internship Management System, working on both front-end and back-end functionalities for managing intern and employee records, attendance, and related data.

PROJECTS

AI Resume Analyzer (Final Year Project)

- Developed an AI-powered resume analysis platform that evaluates user resumes and recommends relevant job opportunities based on skills, qualifications, and experience.

Attendance Management System

- Designed and developed an attendance management system for recording, tracking, and managing employee/student attendance.

Cricket E-Commerce Store

- Built an e-commerce web application for selling cricket-related products online. Developed features including product browsing, shopping cart management, product details, and order processing to provide a seamless online shopping experience.
